

Partner with Epsilon Systems for Environmental Compliance Services

Epsilon Systems offers a range of environmental services designed to help our clients comply with regulatory requirements and minimize the environmental impact of their projects.

Our team of experts includes environmental scientists, engineers, and planners who can help you at every stage of your project.

EPSILON[®]
SYSTEMS

Our approach: working collaboratively with our clients and regulatory agencies to develop tailored solutions for successful outcomes.

For over 25 years, we have provided environmental services to a wide range of industries. Our services include:

- **Environmental impact assessments** (environmental impact statements, environmental assessments, and categorical exclusions) to assess the environmental effects of a proposed action prior to making decisions
- **Permitting and compliance services** (federal, state, and local regulations) to ensure regulatory requirements are met
- **Natural resources management** (biological survey, Section 7 consultation, threatened and endangered species evaluation, and wetlands delineation) to protect sensitive habitats and species
- **Cultural resources management** (Section 106 and 110 consultations, resource management plans, archaeological and historic built environment survey, documentation, and mitigation) to identify, evaluate, and preserve cultural resources
- **Section 404 Consultation** with the U.S. Army Corps of Engineers regarding waters of the United States

Cultural Resource Management

At Epsilon Systems, we understand the importance of preserving cultural resources. Our team of experts includes experienced environmental scientists, planners, biologists, archaeologists, historians, and architectural historians, each with extensive experience in New Mexico and the western United States.

We offer comprehensive cultural resources management programs, designed to help our clients protect and manage historic sites, artifacts, and landscapes.

Key services:

- Archaeological surveys, testing, and data recovery
- Historic architectural inventories and evaluations
- Mitigation planning and monitoring
- Archival research
- HABS and HAER documentation
- Integrated Cultural Resource Management Plans

Preserving the past
to build a better future.

Project Examples

We take pride in delivering

high-quality environmental services to our clients. Here are some examples of projects we have completed:

- Environmental Documentation for the East Pecos Domestic Water Consumers Association Sanitary Sewer System
- Cultural Resources Inventory for Bridge Replacement on I-25 at Williamsburg, New Mexico
- Pre-demolition biological survey of facilities at the White Sands Missile Range Green River Launch Complex, Utah
- Permitting and compliance services for renewable energy projects for private sector and government clients

Natural Resource Management

Epsilon Systems' commitment to natural resources management reflects our belief in protecting the environment for future generations. Our team of experts provides comprehensive planning and support services, including surveying, assessing, and managing threatened and endangered species and their habitats.

Key services:

- Biological surveys
- Endangered Species Act support (U.S. Fish and Wildlife Service Section 7 coordination)
- Mitigation planning and monitoring (best management practices)

Preserving the environment for future generations.

Our team of experts is dedicated to providing exceptional service and delivering solutions that meet our clients' needs. Contact us today to learn more about our environmental services and how we can help you achieve your goals.
